

Important Notice Of Routine Maintenance And Care

- Occasional cleaning of aerator is recommended.
- Use of soapy water and a soft sponge or cloth is recommended.
- Avoid cleaning with chemicals, solvents, or harsh detergents. (THIS MAY SERIOUSLY HARM SURFACE AREA)
- If used with hard water or water with very high mineral content, it is absolutely necessary to clean and dry the faucet immediately after every use. (CALCIUM AND OTHER MINERALS COULD SERIOUSLY DAMAGE SURFACE AREA)
- When installing with filtration system with carbon filters or changing carbon filters, it's suggested to flush the filtered tubes from the system before connecting with the faucet to prevent possible carbon dust contamination into faucet cartridge to cause leaking.
- Please use the aerator removing tool to clean tiny particles of sediment and debris from the pipe accumulated on the aerator at least every 6 months. In case there are construction activities, clean the aerator every month until the work is done to ensure the aerator functions properly.
